Cashless ATM

The Cashless ATM looks like a credit card processing machine, but provides the ability for the business to run transactions with a fee the same way an ATM works. The only difference is that the merchant **can give cash back (optional)**.

Transactions are done at **\$5, \$10 or \$20** increments or pre-set amounts. The machine prints a receipt and the customer can redeem that receipt for goods and services at your business.

Credit Card processing charges the business owner a percentage on each sale, The Cashless ATM has a fee that the customer pays (this differs by business type)

The merchant does not have to PAY any processing fees!

Customers prefer to use Pin-Based Cards for greater security! Debit Cards are widely used and everyone has one. Some customers will even use a regular Credit Card if they have the pin number/Funds are deposited to the Cashless ATM Owners bank account in 24 to 48 business hours!

USING AN EXPERT IS KEY

With 20 plus years of experience we can work with your company to design a program that runs through one platform and offers your clients all the different ways they want to pay.
